LM400+ SERIES

★ Installation A: With an alarm

Illuminates when alarm is Armed. Turns off when Disarmed.
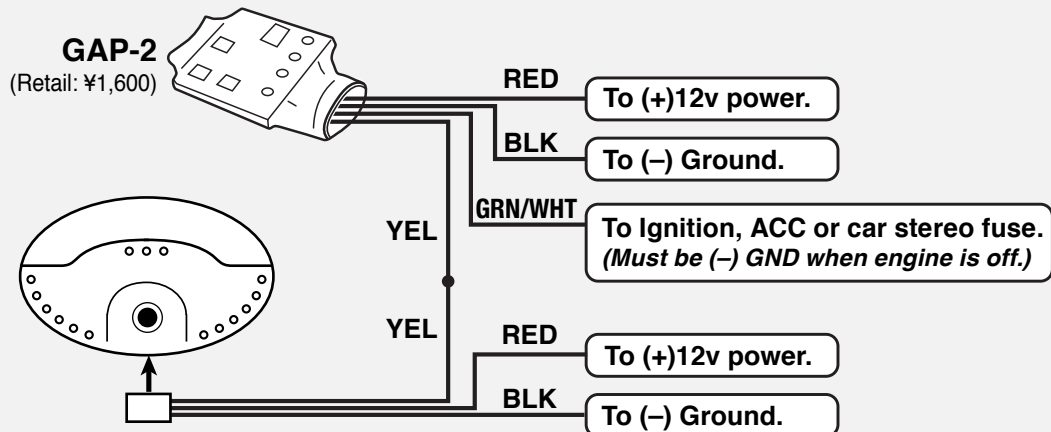

BLK Connect to the (–) car battery terminal or the metal body of the car itself. ⟶ ⊖

YEL Connect to the alarm's (–) Ground-When-Armed output.

RED Connect to constant (+)12v. ⟶ ⊕
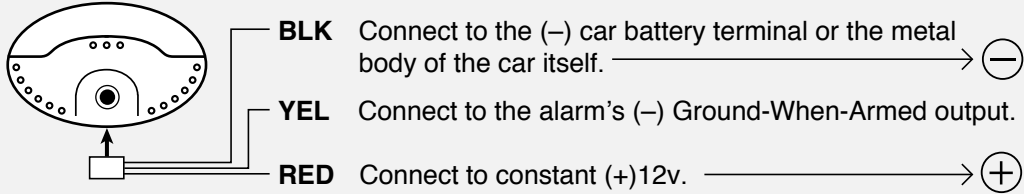

For addition help, please consult your alarm system's manual.

★ Installation B: Without an alarm

INSTALL "B" REQUIRES PURCHASE OF THE OPTIONAL GAP-2

If you install to IGN without the GAP-2, engine noise could damage the LED over time.

GAP-2
(Retail: ¥1,600)

RED To (+)12v power.

BLK To (–) Ground.

GRN/WHT To Ignition, ACC or car stereo fuse. *(Must be (–) GND when engine is off.)*

YEL

YEL

RED To (+)12v power.

BLK To (–) Ground.

NOTE: DO NOT use the instructions in this box if you want the LM400+ to work with an alarm!

⚠ WARNING!

To prevent a fire or malfunction due to a short, be sure to cover the unused connector with the included rubber cap.

16 Selectable Scanning Patterns

To change patterns, press product button while Ignition is ON.

3 Selectable Speeds

To change speeds, press product button while Ignition is OFF.

NOTE1: Pattern will change with each button press.
NOTE2: Flash memory saves your selection when power is cut.

IMPORTANT!

DO NOT illuminate product while driving.
